

Full Screen:

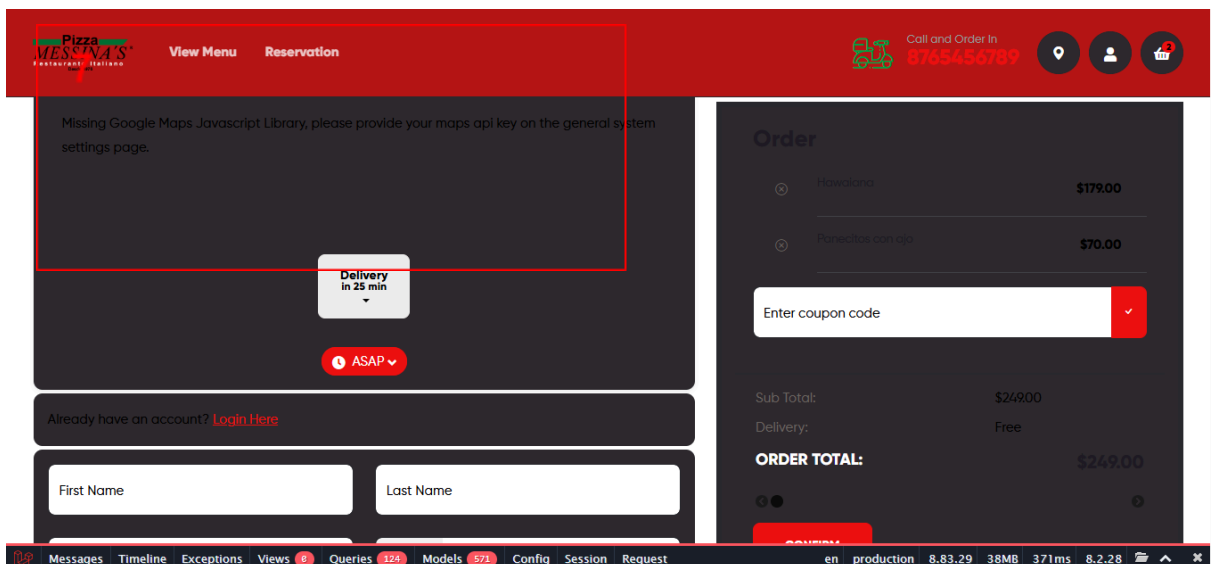

1. The first section is hidden behind the header and can't be seen properly.
2. Several sections have a black background — if possible, I'd like to change that color to green.
3. There's a scroll bar that doesn't look right and I don't understand its purpose — maybe it would be better to remove it.
4. A bottom bar appears that looks like a terminal or console — is it possible to remove it?

5. Is it possible to browse through “All Categories” without changing pages? I mean being able to preview the products within each category before clicking one and getting redirected.

6. Again, I think the black color doesn't fit well with the interface. / I noticed that the prices are shown in USD, but the final order shows the correct total.

7. What do I need to set up in order to display the Google Maps section? / The reservation section isn't necessary since there are no tables to reserve.

8. I feel like the page takes a bit long to load — is there a way to make it faster, or at least change the loading screen and the animated dots?

Mobile Screen:

9. I feel a lot of space between the navigation “centro > Gallery” and the button “Nuevo!”

10. I feel like the “>” button is too close to “Nuevo!” and I don’t quite understand what that button does. Can it be removed?

11. On the homepage, the “choose location” popup overlaps the cart icon.

12. Besides the black color that need to change, I think there's too much empty space between the pizza image and the prices.
